PROFESSIONAL SUMMARY

Final-year Bachelor of Science in Information Technology student with a strong foundation in software development, databases, networking, and information security. Passionate about solving technical problems through software solutions and continuous learning. Experienced in developing academic, personal, and client-based web development projects using Java, C#, React, SQL Server, and Git, with a career goal of pursuing cybersecurity and IT support.

EDUCATION

Bachelor of Science in Information Technology (BSc IT)

North-West University

Expected Graduation: December 2026

TECHNICAL SKILLS

Programming Languages: Java, Python, C#, JavaScript, SQL

Web Technologies: HTML, CSS, Bootstrap, React

Databases: SQL Server, MySQL

Tools & Platforms: Git, GitHub, Jira, Visual Studio Code, Visual Studio, VirtualBox

Operating Systems: Windows

PROJECTS

Job Application Tracker (Ongoing) | *React, JavaScript, HTML, CSS, Git*

- Developing a web application to help job seekers organize and track job applications.
- Designing an interactive dashboard to monitor application status, interview dates, and follow-ups.

- Implementing reusable React components to create a responsive and user-friendly interface.
- Managing source code and version control using Git and GitHub.

Tutor Management System | *C#, ASP.NET, SQL Server, HTML, CSS, Visual Studio*

- Developed a web-based system for managing tutor and student profiles.
- Designed responsive user interfaces using HTML and CSS.
- Implemented SQL Server database operations for secure storage and retrieval of records.
- Collaborated within a team using Visual Studio and version control practices.

Weather Application | *React, JavaScript, HTML, CSS, Git, GitHub*

- Built a responsive weather application using React and a public weather API.
- Implemented city search and dynamic weather forecasts using reusable React components.
- Managed source code with Git and GitHub.
- Designed a mobile-friendly interface with HTML and CSS.

Dog Grooming Landing Page | *HTML, CSS, JavaScript, Bootstrap*

- Designed and developed a responsive landing page for a fictional dog grooming business as part of a SheCodes web development project.
- Built mobile-friendly layouts using Bootstrap.
- Enhanced user experience through interactive JavaScript features.
- Applied basic SEO principles to improve website structure and visibility.

WORK EXPERIENCE

Co-Founder & Web Developer

Elite Web Creations | **March 2026 – Present**

- Co-founded a web development business that helps small businesses establish and grow their online presence.
- Designed and developed responsive websites for local business clients.
- Collaborated with clients to gather requirements and develop tailored website solutions.
- Built and maintained the company's portfolio website.
- Managed website development tasks using Agile principles and Jira.

Owner / Operator

Home Printing & Document Services | January 2023 – Present

- Provided printing, copying, scanning, and laminating services for local community members.
- Designed and formatted professional CVs, cover letters, and business documents using Microsoft Office.
- Assisted customers with document preparation while delivering excellent customer service.
- Managed daily business operations, including customer enquiries, payments, and inventory.
- Maintained printing equipment and ensured efficient service delivery.

Administrative Assistant (Property Sales Support) | March 2024 – December 2024

- Provided administrative and organizational support to a property sales agent.
- Communicated professionally with prospective clients and responded to enquiries.
- Organized and maintained property listings, client information, and documentation.
- Assisted with marketing activities to promote property listings.

VOLUNTEER EXPERIENCE

Volunteer IT Support

- Provided technical support to family and community members by troubleshooting computer and mobile device issues.
- Researched and applied effective solutions to hardware and software problems.
- Assisted with software installation, updates, and basic system maintenance.
- Explained technical solutions clearly to users with different levels of computer knowledge.
